

## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

**CITY OF EAST TAWAKONI (PWS 1900011)** has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During (52) **2024**, we did not monitor or test for LCR and therefore cannot be sure of the quality of your drinking water during that time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for [these contaminants], how many samples we are supposed to take, how many samples we took, when samples should have been taken, and

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were or will be taken
LCR tap sampling <b>2024</b>	10 / annually	0	JUNE 01, 2024 – SEPT 30, 2024	Date:

**What is being done?** In order to return to compliance our system must collect two rounds of lead and Copper sampling. The first round of samplings has been completed, and the second set of samplings will be on Aug, 2025. We will collect twenty (20) lead and copper samples, have them analyzed and send TCEQ the results.

We are working to correct the problem. For more information, please contact:

Please share this information with all other people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
